

How to use the Google Chrome Translation Tool

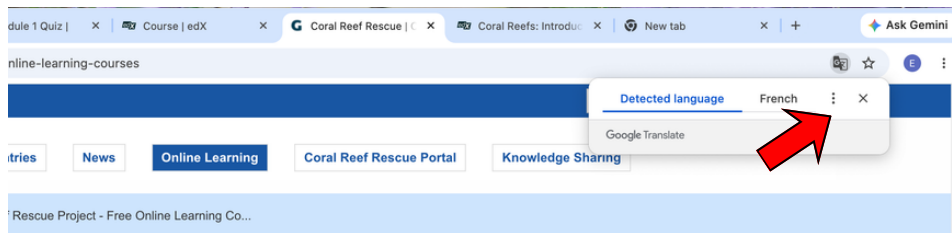

1. Open the [IW Learn-Coral Reef Rescue website](https://coralreefrescue.iwlearn.net/online-learning-courses) using the [Google Chrome](#) Browser
2. Click on the three dots at the top right of the browser window to open the menu.
See image below

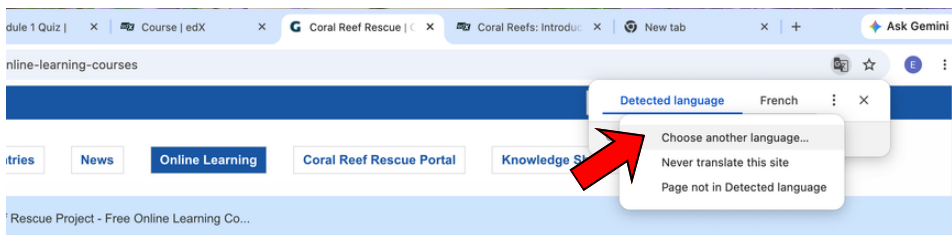

3. Select the translate option. See image below.

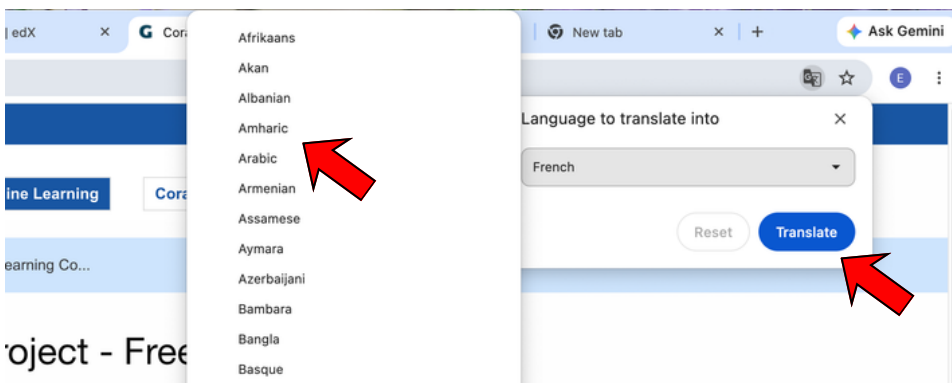

4. This will open the translation tool. Click the three dots to open the menu.
See image below.

5. Select choose another language.

6. Select from the list the language you want the text translated into. Then click translate.

7. The IW Learn Coral Reef Rescue website should now be translated into your chosen language.
8. If you navigate away from this website you will need to follow the same process again to translate the new website. You can use this process to translate the edX Edge website.

Please Note: Within edX edge the Chrome translation tool will only translate website headings and other standard elements of the Edge platform. The course itself has been translated into English, French and Indonesian. To access these multilingual materials use the tabs at the top of each section.
