## CRR103X CORAL REEFS: SUSTAINABLE BLUE ECONOMY

A free online course developed by the University of Queensland

This course will explore how the blue economy can be a driving force for sustainability. It focuses on the critical role that coral reefs and coastal communities play, examining how sustainable economic practices can safeguard both the environment and the people who depend on it.

### Content Covered:

Each module begins by exploring ideas that are useful in understanding different aspects of Sustainable Blue Economy. Learners then apply these concepts to their own local community, analysing the existing blue economy and identifying opportunities and risks associated with transitioning toward sustainability.

### KEY FEATURES OF THE COURSE:

- Practical learning and worksheets that support application to your own context
- Global classroom discussion forums encouraging collaboration and knowledge sharing
- Course materials offered in English and Indonesian - with more languages to come
- Free enrolment and Certificate of Completion available

Participants can then take the concepts and tools learned within the course and work with their communities, organisations or other groups to help them transition toward a sustainable blue economy.

FOR ANYONE INTERESTED IN TRANSITIONING THEIR  
COMMUNITY OR ORGANISATION TOWARD A SUSTAINABLE  
BLUE ECONOMY

### SUGGESTED:

1-2 HOURS PER WEEK FOR  
4 WEEKS, OR SELF-PACED

### About the project

The GEF7 Coral Reef Rescue project is a multistakeholder project implemented through the World Wildlife Fund (WWF GEF Agency).

Designed for real-world impact, our courses equip you with adaptable strategies and tools for diverse contexts. With a strong focus on peer-to-peer knowledge sharing, each course evolves to meet the needs of its audience.
